

# D-Value Series

## Bringing Industrial Quality into Your Home

### *Ideal for Your Home*

We have options that are perfectly suited for any workspace or home environment. Included in this series is our special edition wooden bezel chassis that complements your wood furniture such as desks and home entertainment centers. Its subtle harmonization causes this chassis to go unnoticed when your guests enter the room, giving the room a less technology-cluttered aesthetic.

### *Versatility*

Removable ear mounts allow the chassis to be placed on a desktop, in a rack, or even on its side. With its versatility, you can slide the chassis right into your workspace or home environment, or alter it as your needs for the chassis change.

### *Perfectly Compact*

This series offers 1U to 4U chassis, perfect for small compact spaces like desktops. If you don't find the dimensions you need in this series, we also have a variety of form factors ranging from 1U to 9U.
